brief notes concerning abundance, date of arrival and nesting data. An excellent half tone of a bluebird at its nesting hole adorns the list as frontispiece. Aside from the scientific merit of the list, it may well be used as an ideal by those workers who appreciate system, typographical neatness and exactness.—C. B.

PROCEEDINGS OF THE NEBRASKA ORNITHOLOGISTS' UNION. This is a compact volume of 100 pages with ten excellent illustrations, setting forth the proceedings of the second annual meeting of the Union at Omaha on Jan. 12, 1901. The minutes, constitution of the Union and a list of members is followed by 21 papers on various scientific subjects relating to birds, by 17 authors. Many of the papers are valuable contributions to the science of ornithology, two notable titles being "Internal Parasites of Nebraska Birds" by Prof. Henry B. Ward and "Migration Records and Nebraska Records" by Robt. H. Wolcott. The present notice renders it impossible to consider any of the articles in detail, but the report is one which every active ornithologist will wish to own.

The present roster of membership shows 4 honorary, 63 active and 36 associate members. The officers of the Union for the present year are I. S. Trostler, president; Caroline Stringer, vice-president; E. H. Barbour, recording secretary; R. H. Wolcott, corresponding secretary. It may be remarked that the present Proceedings are a substantial improvement over the first annual report, thus indicating a healthy growth of this energetic state club. The Nebraska Ornithologists' Union has happily solved the question of publishing its own official organ, and instead of attempting a monthly or quarterly journal, which a moderate membership renders incapable of support, it combines its transactions in a single annual report, substantial in text and lasting in value.—C.
